## AUTOMATION

French manufacturer of CNC milling machines for non-ferrous materials

### DCL

The DCL has been designed for customers in the wood industry, who wish to turn to a large-scale CNC controlled equipment

Available in 2 basic sizes :

- 2100 x 3100 mm (82.6 x 122 in)
- 2100 x 4100 mm (82.6 x 161.4 in)

The basic configuration of these 2 sizes includes :

- A 4 Kw, 24,000 RPM electro spindle with automatic tool change by ISO30 spindle taper , ER32 collet chuck, max. tool diameter 20 mm (0.78 in)
- A tool magazine for 6 tools with tool touch probe
- A vacuum table for parts holding
- A pneumatic lifting suction system for chip removal
- Minimal quantity lubrication (MQL)

DCL can be configured with various options to meet your production needs
